www.cornerstoneranch.net

Although Cornerstone Ranch was formally organized and named in 2000, that was not the beginning of the cattle herds. LaMoynes Peters came from a long line of cattle ranchers. His great grandmother and his grandmother both raised cattle in Lincoln County, New Mexico. When LaMoynes father was orphaned at 13, he lost control of these cattle but maintained the Bar E X brand assigned to his grandmother around 1887.

Seedstock for the present commercial Hereford herd was bought in 1924 by LaMoynes and Gilbert Peters. In 1934 the first registered Hereford bull was bought. It was the Grand Champion bull at the Eastern New Mexico State Fair Open Livestock Show shown by Shaddock’s of Carlsbad, NM. The price of this bull was equal to approximately the price of 12 calves. This was the beginning of selling bulls. Bull calves were sold from this bull locally for several years. Our standards for selecting herd sires have not changed.

The average cow on the ranch weighs about 1200 lbs. The two registered herds provide the bulls for the commercial herd. Great bloodlines such as: Grand Slam, JC MO LE, L1 Pacesetter, SC Classic, L1 Image, HH Home Builder, LH Summit, Sensation & Durango, as well as several Upstream Herefords and Churchill Cattle bulls have been used to build the Hereford cow genetics. Churchill Wildcat 754E and NJW 76S 27A MOREBODY 182D have made their mark on our program. Wildcat progeny has led the Tucumcari Feed Efficiency Test for several years in terms of gains and efficiency. His progeny are extremely feed efficient. 182D had made phenomenal daughters that are extremely maternal with gorgeous udders. Churchill Broadway 034H has been used on heifers and we are extremely pleased with his sons and daughters.

Conneally Freightliner, PAR Benchmark, TC Freedom, HC Faxline RightTime, QLC Structure, Lazy JB Watchout, Lazy JB O’Reilly have contributed to the development of the Angus cow herd. We are extremely pleased! FAR Appearance 31E, FAR Opportunity 286F, and FAR Seedstock 332F have had a tremendous impact on our program. We have brought in several new Angus sires in the yearlings and look forward to the growth and functionality that they have packed into an attractive and sound animal.

A deep body, thick, large boned, well uddered cow is our goal. In our Hereford herd pigment around the eyes and on the scrotum are a must. Cattle must be able to perform well in our desert climate. Docility is extremely important to us and we strive to produce cattle that balance phenotypic traits and EPDs to meet the needs of the everyday cattleman. We realize the importance of feed efficiency and strive to produce cattle that can thrive on limited resources. We feel our prefix for our cattle TRL portrays our goals –

TOP RANGE LAND Cattle.
